The first object of this work is to present a clear and concise account of the history of the human mind, from its earliest beginnings to the present time. It is intended for the use of students and teachers of psychology, and of those who are interested in the history of human thought.

In the second part of the work, the author discusses the various theories of the mind, and the methods of investigating its functions. He also presents a summary of the most important facts of psychology, and discusses the various applications of psychology to other branches of knowledge.

The third part of the work is devoted to a discussion of the various theories of the mind, and the methods of investigating its functions. It is intended for the use of students and teachers of psychology, and of those who are interested in the history of human thought.
