\* Sammen med brølløpsforbuds.

\* Die Lokomotiven unter den Nummern 676—706 sind von der Reichlichen Reichsbahn beschafft.

\* Die Nummern der Heiligen des Nordbogens.  
 \* Die Zoonumern unter den Nummern 676-706 sind von der Heiligen Waltham befreit.  
 \* Die Zoonumern unter den laufenden Nummern 278-282, 336-339, 391-395, 397-399, 471 und 472, 478-487, 491 und 499 und 568-580, im Ganzen 24 Stck., sind aus Verneuerungsfest befreit.

## Bemerkungen.

Die ungekuppelten Maschinen 1, 2, 23–25, 41, 42, 58–60 haben Balanciers zwischen den Federn der Treib- und Vorderachsen und eine Quersfeder über der hinter der Feuerkiste gelegenen Hinterachse. Die Expansion wird hierbei durch einen besonderen Mechanismus und Schieber bewirkt. Von den Maschinen 3, 4, 8, 10 und 120, welche ursprünglich sämmtlich mit ihrem Vordertheil auf einem drehbaren, vierradrigen Gestell ruhten, hat im Laufe der Zeit die Maschine 10 in sofern eine Aenderung erlitten, als das Vorgestell, das, wenn es leicht belastet ist, für das Befahren von Curven nur unerhebliche Vortheile bietet, dagegen die Gefahr bei etwaigen Entgleisungen vermehrt, sowie auch die Reparaturkosten wesentlich steigert, in eine feste Achse umgewandelt ist.

Unter den Maschinen 3, 4, 8 und 120 ist das Vordergestell mit 4 Rädern ebenfalls fortgenommen und für die eine untergebrachte Achse ein besonderer Rahmen mit vor der Mittelachse gelegenen Drehpunkten geschaffen worden, so daß die Achse verstellbar ist und in der nach beiden Seiten geneigt angefertigten Druckauflage eine seitliche Verschiebung bis zu 2" nach jeder Seite zuläßt (System Bissel), wodurch es ermöglicht, daß die Maschine mit Leichtigkeit die engsten Curven durchlaufen kann. Die Maschinen 3, 4, 8 und 120 sind außerdem zu Tendermaschinen umgebaut worden, was dadurch bewirkt worden ist, daß auf dem Langkessel seiner ganzen Länge nach ein anschließender Wasserkasten und zu beiden Seiten des Feuerkastens Kohlenbehälter angebracht sind.

Das Bremsen geschieht mittelst Schraubenspindel, Hebel und Bremsklößen, welche auf die Treibräder wirken. Die vorstehend aufgeführten fünf Maschinen haben Balanciers zwischen den Treibachsen und arbeiten mit Expansion, letztere kann jedoch nur mittelst Couliissenstellungen durch den Vertheilungsschieber bewirkt werden.

Die Maschinen 19–22, 26–40, 61–84, 93–102, 106–111, 123, 126–154 haben Balancier-Verbindung zwischen den vier, vor der Feuerkiste gelegenen Treibrädern und einen Querbaliancier zur Verbindung der beiden Laufachsensfedern. Die Maschinen 21 und 28 erhielten neue Dampfkessel zu 112 Pfund Druck.

Sämmtliche Maschinen arbeiten mit Expansion, die, wie bei den Maschinen 1, 2 u. s. w., mittelst eines besonderen Hebels gehandhabt und durch besonderen Schieber bewirkt wird.

Die Maschinen 106–111, 126–154 unterscheiden sich von denen Nr. 19–22, 26–40, 61–84, 93–102 und 123 nur dadurch, daß sie für einen höheren Maximaldruck concessionirt sind und statt der gewöhnlichen Speisevorrichtungen Dampfschraupumpen, sowie auf dem Langkessel einen zweiten Dom mit dem Schau'schen Apparat zur Ablagerung von Kesselfein besitzen.

Die Maschinen Nr. 43 und 44 sind Tendermaschinen schwersten Kalibers und speciell für den Dienst auf der geneigten Ebene zwischen Erkrath und Hochdahl bestimmt. Dieselben haben 6 vor der Feuerkiste liegende, gekuppelte Räder, Wasser- und Kohlen-Reservoirs befinden sich zu beiden Seiten des Langkessels und ruhen theils auf dem Hauptrahmen, theils auf einem besonderen Außen-Rahmen. Jedes Reservoir ist durch eine geneigte Querwand in zwei Theile getheilt, von denen der vordere zur Aufnahme des Speisewassers, der hintere als Kohlenbehälter dient. Die Hinterachse wird durch 4 Klöße gebremst, welche mittelst Schraubenspindel und Hebel angebrückt werden. Die Maschinen haben insofern eine Aenderung erfahren, als statt der bisherigen Fahrpumpen zwei Strahlpumpen angebracht sind; in Folge davon ist auch die Condensationsvorrichtung abgenommen worden.

Die Maschinen Nr. 45, 48, 49 und 50 sind von der früheren Düsseldorf-Elberfelder Bahn übernommen und haben Balancier-Borrichtung zwischen den vier vor der Feuerkiste gelegenen Treibrädern. Nr. 45 ist wie die Nr. 3, 4, 8 und 120 zu einer Tender-Maschine umgebaut und in derselben Weise wie diese mit Wasserkasten und Kohlenbehälter sowie mit Bremsen versehen. Eine bewegliche Vorderachse besitzt dieselbe nicht, wohl aber sind bei Gelegenheit des Umbaus die mit ihren Enden unmittelbar auf den Achslagerstüben ruhenden, gemeinschaftlichen Tragsfedern beseitigt, wodurch das gewöhnliche Balancier-System ersetzt worden. Maschine Nr. 48 ist von gleicher Construction.

Die Maschinen Nr. 85–92 sind gekuppelte Personenzug-Maschinen, die seiner Zeit mit Rücksicht auf die schwierigen Curven und Steigungs-Verhältnisse der Ruhr-Sieg Bahn beschafft worden sind. Dieselben haben Balancier-Verbindung zwischen den vier vor der Feuerkiste gelegenen Treibrädern und Querbalianciers zwischen den beiden Laufachsensfedern. Die Expansion wird, wie bei der vorigen Maschine, durch Couliissensteuerung bewirkt. Nr. 124 und 125 sind gekuppelte Personenzug-Maschinen mit gleicher Construction wie die vorerwähnten und unterscheiden sich von diesen nur dadurch, daß sie für einen höheren Maximaldruck concessionirt sind und auf dem Langkessel einen zweiten Dom mit dem Schau'schen Apparat zur Ablagerung von Kesselfein besitzen. Die früheren Speisepumpen der ersten Sorte dieser Maschinen sind zum größten Theil successiv durch Strahlpumpen ausgewechselt worden.

Die Maschinen Nr. 103–105 sind Tendermaschinen, haben außenliegende Steuerung und Retourkurbeln, Balancier-Verbindung zwischen den vier vor der Feuerkiste gelegenen Treibrädern und Schlittenbremsen. Die Expansion ist wie bei den vorerwähnten Maschinen.

Die Maschinen Nr. 54–56, 112–117 und 155 sind gekuppelte Personenzug-Maschinen, bei denen sich jedoch die Kuppelachsen unter der abgekrühten Feuerkiste befinden; dieselben besitzen den Schau'schen Apparat mit Ausnahme von 112, 114, 115, 116 und 117, von denen derselbe abgenommen ist; auch haben dieselben Dampfschraupumpen. Letztere haben allgemeinen Eingang gefunden und werden sowohl für alte durch Verschleiß abgängig werdende gewöhnliche Speisepumpen, als auch bei allen neu zu beschaffenden Maschinen angewendet. Bei den neuen Maschinen und solchen, bei denen die früheren Speisepumpen gegen Strahlpumpen ausgewechselt werden, geschieht die Anbringung der Strahlpumpen in horizontaler Lage unter dem Trittbloch des Führerstandes. Diese Construction hat den Vortheil, daß das Wasser selbst bei dem niedrigsten Wasserstande im Tender von selbst zufließt, wodurch die Sicherheit und Zuverlässigkeit der Arbeitsvorrichtung eine wesentlich höhere geworden ist.

Die Maschinen Nr. 156–160, 225–237, 278–287 sind ebenfalls gekuppelte Personenzug-Maschinen, welche mit den oben erwähnten Nr. 112–117 übereinstimmen; nur ist hier der Schau'sche Kesselfein-Apparat in Wegfall gekommen. Derselbe hat bei dem hiesigen Speisewasser nicht den gewünschten Erfolg gehabt, indem der Niederschlag sich auf den kohlen-sauren Kalk beschränkte, während der weit verderblicher wirkende schwefelsaure Kalk nach wie vor starke Inkrustation bildete; außerdem wurde bemerkt, daß sich unterhalb des Apparates zwischen den Siederöhren starke Anhäufungen von Kesselfein bildeten, der nur schwer beseitigt werden konnte.

Die Maschinen Nr. 225–234 und 278–287 sind mit nach oben erweiterten Schornsteinen (Brüsmann's Patent) versehen.

Die Maschinen Nr. 161–224 und 268–277 sind Lastzug-Locomotiven, welche von den oben erwähnten 19–22, 26–40 u. s. w. nicht unerheblich abweichen. Zunächst ist die Construction des Feuerkassenmantels insofern verändert, als die hohe gewölbte Kuppel vereinfacht worden ist. Die Dome sind, wie bei den bereits erwähnten Maschinen Nr. 43–44. Die sämmtlichen 6 Räder sind durch Kuppelstangen verbunden, um auch bei ungünstigen Verhältnissen mit größerer Sicherheit eine normale Last fortzuschaffen zu können. Ferner haben dieselben Brüsmann'sche Schornsteine. Eine Vereinfachung wurde außerdem dadurch herbeigeführt, daß die bei den Lastmaschinen bisher übliche Expansions-Vorrichtung durch einen besonderen Schieber fortgefallen ist. Die sämmtlichen Maschinen sind mit je zwei liegenden Dampfschraupumpen versehen.

Die Maschinen Nr. 238–249, 251, 252, 259–267 sind von der Aachen-Düsseldorf-Elberfelder Bahn übernommen, von denen die Maschine 258 im Laufe des Jahres 1872 als unbrauchbar ausrangirt worden ist.

Die Tender der Maschinen 238–243 sind besonders, alle übrigen mit den Locomotiven zusammen beschafft. Die Maschinen 288–297, 303–309, und 404–417 sind Tendermaschinen, welche speciell für den Rangirdienst auf Bahnhöfen mit kleineren Curven, namentlich im Hafen zu Ruhrort beschafft sind. Dieselben haben, wie die in den Bahnwerkstätten umgebauten Maschinen 3, 4, 8 und 120, eine radial verstellbare Laufachse. Das Wasserbassin liegt wie bei jenen auf dem Langkessel; die Kohlenbehälter zu beiden Seiten der Feuerkiste; die Treibräder haben abweichend von den Maschinen 3, 4, 8, 120 einen circa 8 Zoll kleineren Durchmesser, und die Kessel eine um 11 Zoll größere Länge erhalten.

Durch diese Construction ist es möglich geworden, der Laufachse eine größere Belastung zu geben. Wesentlich verschieden von denen der sämtlichen übrigen Maschinen ist die Construction des Feuerkastenmantels. Die gewölbte Kuppel ist in Wegfall gekommen, und statt dieser eine horizontale Decke des Feuerkastenmantels (System Velpoire) angeordnet worden, welche durch lange eiserne Stehbolzen mit der Decke der Feuerkiste direct verbunden ist.

Die horizontalen Deckenanker der Feuerkiste sind dadurch fortgefallen, so daß es ermöglicht ist, die Decke jederzeit von Kesselstein befreien zu können. Die Maschinen arbeiten mit Expansion, welche durch einfache Schieber bewirkt wird. Die Steuerung ist, wie bei den Maschinen 103–105, außen liegend; das Bremsen geschieht durch Bremsklötze, welche mittelst Hebel und Schrauben- und Spindel gegen die Hinterseite der Kuppelräder gedrückt werden.

Die Maschinen 5, 6, 250, 298–302, 368–376 sind Tendermaschinen für Personenzüge und speciell für den Dienst auf den kleineren Zweigbahnen Mülheim a. d. Ruhr, Duisburg, Langendreer, Witten u. s. w. bestimmt. Die beiden gekuppelten Achsen liegen bei diesen Maschinen vor der Feuerkiste; die Federn derselben sind durch Balanciers verbunden, die hinter der Feuerkiste befindliche Laufachse hat Quersfedern, zu beiden Seiten befinden sich die Wasserbehälter, welche zusammen einen Fassungsraum von 3 Cubikmeter (100 Kubikfuß) haben. Der Kohlenraum ist an der Hinterwand des Führerstandes angebracht; die Maschinen arbeiten mit variabler Expansion, welche nur durch Stellungen der Coullisse und einfache Schieber bewirkt wird. Das Bremsen geschieht mittelst Hebel, Schrauben- und Spindel und Bremsklötze, welche auf die Treibräder wirken.

Die Maschinen 7, 9, 11–15, 17, 18, 46, 47, 50, 53, 57, 118, 119, 121, 122, 310–353, 377–386, 388–403, 425–454, 465–485 stimmen bezüglich des Lauf- und Treibwerks genau mit den Maschinen Nr. 161 u. s. w. überein. Bei den Kesseln jedoch wurden, wie bei den bereits erwähnten Tendermaschinen Nr. 288 u. s. w., die Feuerkistendome weggelassen und dagegen eine horizontale, nach den beiden Seitenwänden zu stark abgerundete Deckplatte angewandt, deren gegenseitige Verankerung mit der parallelen Feuerkistendecke durch lange eiserne Stehbolzen erzielt wurde.

Durch den Wegfall der bei dieser Construction überflüssigen schweren eisernen Deckenanker wurde die Belastung der Hinterachse nicht unwesentlich vermindert, und gab dies Veranlassung, das Gewicht durch Vergrößerung der Feuerkiste, resp. des Feuerkistenmantels in der Längenrichtung zu ersetzen.

Die hierdurch erzielte größere Kessel- und directe Feuerberührungsfläche hat die Verdampfungsfähigkeit erheblich vermehrt und gute Betriebs-Resultate herbeigeführt. Um den Dampfdruck für den in Wegfall gekommenen überhöhten Feuerkistendom zu entschädigen, wurde dem Langkessel gleichzeitig ein größerer Durchmesser gegeben, und außerdem das vom Feuerkistenmantel nach dem Regulator-Dom führende Sammelrohr nicht im Dampfdruck des Langkessels, sondern über dem letzteren hergeführt.

Die Schnellzug-Maschinen Nr. 235–237, 256, 354–367, 387, 418–424 stimmen mit den Maschinen 225 u. s. w. im Wesentlichen überein und unterscheiden sich von denselben nur dadurch, daß die Decke des Feuerkistenmantels horizontal construirt ist, wie bei den vorerwähnten Lastzugmaschinen.

Die Lastzugmaschinen Nr. 455–464, 485–494 stimmen mit den Maschinen Nr. 424 u. s. w. genau überein, ferner die Schnellzug-Maschinen Nr. 505–509 mit Maschinen Nr. 418–424, sowie im Allgemeinen auch die Lastzug-Maschinen Nr. 643–660. Letztere Maschinen sind von der Firma „Beyer, Peacock & Comp. in Manchester“ geliefert und an denselben sämtliche drei Achsen gekuppelt, und unterscheiden sich diese Maschinen nur dadurch von der Construction der vorerwähnten Lastzug-Maschinen, daß dieselben Schraubensteuerung haben. Die Kessel sind für einen Druck von 9 Atmosphären concessioirt.

Die Speisung der Kessel geschieht durch Schaulöcher Strahlpumpen; die Sicherheitsventile sind nach Ramsbottom'scher Construction. Die Tender haben Bremsen, welche durch Schrauben und Hebel bewegt werden, und wirken die Bremsklötze nur von einer Seite gegen die Räder.

Im Laufe des Jahres sind neu hinzugekommen:

Die Lastzug-Maschinen Nr. 661–667, welche mit den Maschinen Nr. 643–660 genau übereinstimmen;

ferner die Schnellzug-Maschinen Nr. 510–529, die die gleiche Construction wie die Maschinen Nr. 505–509 haben;

ferner die Lastzug-Locomotiven Nr. 548–566, 812–815 und 16 II von gleicher Construction wie die Maschinen Nr. 485–494;

ferner die Personenzug-Tendermaschinen Nr. 530–539, 706–711, dieselben stimmen mit den Maschinen Nr. 368–376 im Wesentlichen überein und unterscheiden sich von letzteren nur dadurch, daß sie für einen Druck von 10 Atmosphären concessioirt sind und die Decke des Feuerkistenmantels horizontal construirt ist;

ferner die Güterzug-Tendermaschinen Nr. 540–547, 557 II, und 52 II, welche sich bezüglich ihrer Construction mit den Maschinen Nr. 404–417 in Uebereinstimmung befinden;

ferner die Maschinen Nr. 495–504 und 669, welche für gemischte und schwere Personenzüge bestimmt sind. Bezüglich ihrer Construction unterscheiden sich dieselben von sämtlichen anderen Personenzug-Maschinen dadurch, daß sie mit beweglicher Vorderachse versehen sind und außenliegende Steuerung haben. Die Kessel sind für einen Dampfdruck von 10 Atmosphären concessioirt, die Feuerkistendecke mit dem halbrund ausgeführten oberen Theil des Mantels ist durch Stehbolzen verankert. Die Maschinen sind mit zwei Sicherheitsventilen nach Ramsbottom'schem und einem dergleichen nach Reggenhof'schem System versehen; letzteres ist an dem vorne befindlichen Dome angebracht.

Hinsichtlich der von der Hessischen Nordbahn übernommenen Locomotiven ist noch Folgendes zu erwähnen:

Die übernommenen Tender sind sämtlich von den Fabrikanten Henschel & Sohn geliefert. Die Maschinen Sababurg und Hirsch haben Fahrpumpen, aber keine Condensations-Vorrichtung, die Maschinen Nr. 826–828, 831–849 und Atlas haben Injecteure.

Die Maschinen Sababurg und Hirsch, welche nur auf der Carlsbahn laufen, haben bewegliches Vordergestell mit zwei Achsen, die Treibachse liegt vor, die Kuppelachse hinter der Feuerkiste. Alle anderen Maschinen haben drei Achsen und liegen dieselben unter dem Langkessel. Bei den Maschinen Sababurg und Hirsch, sowie Nr. 821–845 ist die Treibachse mit der Kuppelachse durch Balanciers verbunden.

Die Maschinen 821, 823, 841, 842 und 843 haben außerdem noch einen Querbaleancier für die Vorderfedern.

Bei den Maschinen 846–849 sind keine Balanciers angebracht.

Im Laufe des Jahres wurden ausrangirt die Maschinen Hirsch und Atlas.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Anmerkung: 1. Kutschen wurden von Locomotiven der Thüringer Staatsbahn auf der Strecke von Emsdörfer bis Kaden in  
Summa 30,001 Kilometer über 2,670<sup>1</sup>/<sub>2</sub> Meilen paraffiniert.  
2. Die ausgerichteten und der Bau-Wartung übergebenen Locomotiven Jax und Cdr haben in 400 Beiträgen in  
Summa 30,156 Kilometer über 5,230<sup>1</sup>/<sub>2</sub> Meilen paraffiniert, 620 Stunden Rangierlokomotiven und 606 Stunden Schienenlokomotiven  
geleistet.

## Nachweisung.
