

AMPLIS-  
SIMI SENA-  
TVS AVGVSTANI  
DECRETVM MEDICOS CHI-  
RVRGOS ET PHARMACO-  
POEOS CONCER-  
NENS.

I.

**R** Eipub. interest, vt Medici Augu-  
stani Hippocraticam Galenicamq;  
doctrinam, veram nimirum ac ra-  
tionalem seſeantur, & concordēs mu-  
nus suum ritè *decenterque* obeant, ne  
publicum commodum ob priuata diffi-  
dia, detrimenti quidpiam patiatur.

II.

Proindè in consilium conuocati, fi-  
delitè, candidè ac diligentè inter se  
conferant, quæ publicæ salutis ciuibus-  
que, cum omnibus, tum singulis, non  
tàm ad conseruandam, quam reparan-  
dam

dam valetudinem proficua futura doctē  
prospexerint. Nec uero quemquam in  
sui utilitatem quidquam celare conue-  
nit, quod proximo in desideratæ salutis  
spem, vel usum cedere possit, adeò ut li-  
uor, odium, ac æmulatio, arti Medicæ, si  
non infirmam famam, saltem diffiden-  
tiam apud plerosque pariens, prorsus  
absit ac exulet, cum præsertim consul-  
tandi mos iste, jam dudum ab Hispanis,  
Gallis, Italis, Anglis, & exteris nationi-  
bus ad Germanos sit deriuatus. Vnde  
eos qui communia istiusmodi consilia  
auerfantur, aut sese ab iis callidè subtra-  
here student, ab insitiæ aut malitiæ su-  
spicione minimè alienos esse creden-  
dum est.

### III.

Neque vèro quisquam ad secreta  
sua, si sese quædam tenere putauerit,  
aliis propalanda aut euulganda ob id  
obstringi existimet, dummodo con-  
sultationis rationem ac communem  
Medicationis scopum aut intentio-  
nem

nem non peruertat. Hinc etiam Pharmacopœos iureiurando adstringimus, ne ea, quæ vel Medici, vel ægri silentio regenda præceperint aliis diuulgent, unde Medico dispendium, ægro vero infamia nonnunquam emergere possit.

#### IV.

Medicamentis insuper tutis, ac innoxiiis utantur, quibus longa experientia ac priscegrum Medicorum auctoritas famam jam dudum fecit, & quæ docta posteritas multiplici usu fida esse comprobauit. Minimè tamen Chymica aut Spagirica vocata Medicamenta à pharmacandi usu excluduntur, dummodo hæc ritè præparata non nisi à peritissimis Medicis qui experimentum rationi atque hanc illi iungere norunt dextrè, haudquaquam verò temerariè usurpentur,

#### V.

Chirurgi, Tonsores, ac Balneatores, limites suos non transgrediantur, sed officii ac Iurisiurandi sui annuatim præstandi memores, ea solum circa ægros perfici

perficiant, quæ professioni ipsorum debentur, purgantia pharmaca quibus in prouincia Medica summa debetur attentio, maximè vero Catapotia ex Turbetho minerali, aut Antimonio ac similibus, nullatenus præparantes, multo minus exhibentes, minimè vero vendentes.

## VI.

Quod si graue aliquod ac lethale symptoma, circa vulnera ictus, aut puncturas, contusiones, ossium fracturas, aut præcipites ab alto lapsus obtigerit, suis non nisi iudiciis vnum vel plures ex Medicinæ Doctoribus in consilium adhibeant, ab iisque quid facto opus sit, sciscitentur.

## VII.

Pharmacopœi quoque falcem in Medicorum messem non mittant, vnde pharmaca eliciuè præsertim purgantia aut Menses pellentia medicamenta absque Medici præscripto neutiquam diutendant, ne vel ciues incauto eorum usu lædantur, vel medicamenta ipsa infamiam subeant, cum de his, solis Medicis

eis fidei præstandæ , dignotionis habendæ, ac rationis reddendæ onus incumbat.

### VIII.

Ablegandi porrò sunt meritò inertes Agirtæ , periculofam folùm experientiam eamque temerariam fine ratione profeffi, nulla artis theorematà calentes, nullisq̃ue doctrinæ Medicæ præceptionibus imbuti, qui folà fuà vel audacia, vel infcitia confifi, artem tam difficilem, abfq̃ue ferè cōfcientia tractaturi falfo fe pro veris Medicis venditare confueverunt.

### IX.

Minus autem toleretur Circumforaneorum, Stellionum, Empiricorumque proteruitas, quibus fe fe plerumque admifcent Apoftatæ, Hebræi, Cerdones, Sortilegi, Circulatores, Præftigiatōres, Clancularii, Vetulæ, ac Doctores Bullati, qui fe fe Academicis aut Collegialibus Medicorum examinibus fubijcere renuunt, nummorum expifcatores, & populi quafi quidam prædones,

hi

hi enim protinus ablegentur, ab artis  
quam nesciunt operibus arceantur, ac  
e familia Medica seuero Magistratus ju-  
dicio proscribantur, sitque ~~is~~ maximè  
vero grauiores morbos concernens me-  
dicatio quæuis strenuè interdicta. Li-  
berum tamen erit familiaribus cuique  
remediis vti, citra fraudis suspensionem,  
aut pecuniæ aucupium, nisi periculosa  
ea medicatio fuerit, quæ agris in noxam  
vegere possit.

X.

Pharmacopœi publico Iureiurando  
nobis obstricti, Medicamenta quæuis  
composita, ad normam huius Dispens-  
atorii nostri, præuia Visitatoris Ordi-  
narii, vel eius vices gerentis Medici cen-  
surâ, & absque vel præter hanc nullate-  
nus præparent, aut diuendant, ad quod  
præstandum, Pharmacopœorum quo-  
que famuli iisdem legibus ligati tenen-  
tur, quos etiam in particularibus Medi-  
corum præscriptis attentos ac diligentes  
esse decet, in quib. si quando dubii quid-  
piam obtigerit, eius præscripti auctorem  
adeant,

adeant, & quid sibi faciendum sit, per-  
contentur. Medicamenta etiam omnia,  
vt juxta tenorem nostræ Taxæ æstimata  
vendantur, præcipimus, quod si autem  
particulatim aliqua alia præparare ne-  
cesse fuerit, ea ipsa justo valore veneant.

XI.

Atque vt vnanimitas inter Medicos  
ac Pharmacopœcos inecorrupta perseue-  
ret, volumus vt Medicorum aut Pharma-  
copœcorum nullus alterutrum in alte-  
rius præiudicium laudibus vel extollat,  
vel vituperio deprimat, cum ad æqualia  
pondera ferenda obstrictis, par quoque  
honor & præmium meritò debeat.

XII.

In horum debitam obseruantiam  
quotannis à Medico Collegio quem-  
piam ad id munus habilem in Decanum  
eligi iubemus, cui pro Vicario vnum ex  
senioribus in subsidium adhiberi, com-  
modum esse duximus.

*Decretum in Senatu*  
*3. Septemb. 1613.*
