

to this circumstance, the cure is always commencing but never proceeding. It should, however, also be kept in mind that medicines, such as the mercurial salts, arsenic, &c., are apt to accumulate in the system; and danger may thence arise if the doses too rapidly succeed to each other. The action also of some remedies, elaterium and digitalis, for example, continues long after the remedy is left off; and therefore much caution is requisite in avoiding too powerful an effect, by a repetition of them even in diminished doses.
